MOUNT VERNON CHEMICALS, LLC - DRY PROCESSING

Our ISO 9001-2008 registered plant in Greer, SC, strategically located in the Southeastern US between Charlotte and Atlanta near Interstates 85, 26, 20, 40, 77 and 75, just a short distance from the ports of Charleston and Savannah, can Toll Blend and/or Repackage your product at a very competitive cost. We have the flexibility of packaging into valve or open-top bags, drums, supersacks, or bulk. Our Customer Focus and the Versatility of our operations allows our customers the option of specifying the exact package weights that they might require for their operations. A brief list of our capabilities is as follows:

Blending/Repackaging Capacity – 150 MM #/year
4 Ribbon Blenders with capacities ranging from 1000# up to 10,000# per batch.
3 Stainless Steel PK (Double Cone) Blenders with capacities ranging from 500# to 15,000# per batch.
Double Drum Mixer – used for mixing small samples at a time (100 – 500#)

We have the capability to bag off product from these blenders in many ways:

Bulk Packaging directly into Bulk Trucks is available.
Supersack, gaylord, drum, box, and bag packaging is available.
Package sizes are very flexible. We can fill packages to the customer's requirement.

Bagging is available in open-top or valve filled bags. We can use customer supplied bags or we can choose from our wide selection of bags.

We have grinding capabilities available. We are able to grind a variety of materials with our optional cryogenic grinding set-up.

We have 7 silos for incoming raw materials. 4 silos will hold railcar quantities of material. 2 silos will hold up to 2 bulk truckloads of material. The last silo is located inside the production facility and is used to package material directly from the silo.

If you have an interest in discussing a toll manufacturing or packaging arrangement, please feel free to Contact Us. We look forward to working with you to satisfy your product/repackaging needs.
